OGC HAS REVIEWED.

SUBJECT

Report of conversation with

25X1A

1. At the request of undersigned interviewed in connection with a possible patentable invention. Basically, the theory is to utilize three electronic units in combination, performing the functions of scanning, correlating and reporting in the area of fingerprinting analysis. According to it 25X1A 25X1A 25X1A 25X1A

The above information has been related to 25X1A had suggested that initiate action 25X1A on the proposed item by submitting it to the Incentive Awards Committee under CIA Regulation Presumably, the matter would then be forwarded to the Director of Security and 25X1A evaluation and appropriate action. concerned with the legal consequence of such submission, particularly is somewhat with respect to his right, title, and interest in any patentable invention. I advised ! that the controlling standard on such matters was Executive Order 10096, Agency regulations 25X1A was most specific in stating that the invention, if any, was not made within the specifically designated duties assigned to him by OCD and that it was made on his own time, without the use of Agency facilities, and in a field unrelated to his employment.

3. I advised that he was free to follow the instructions of and submit the matter concerned under Regulation and to include a statement with respect to the criteria established under Executive Order 10096, a consequence of which would be a reservation of the commercial residuum to
